

Weather Forecast Office Fort Worth, TX

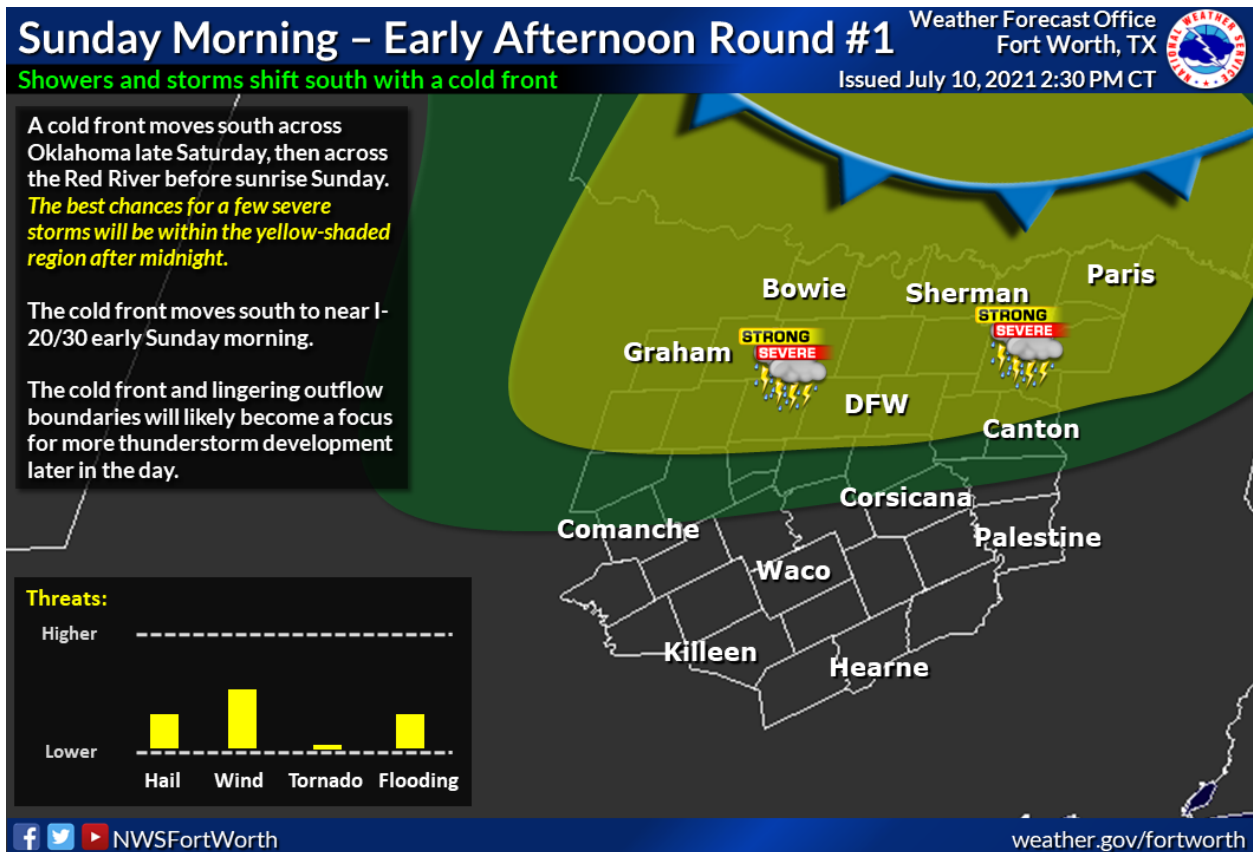

Bottom Line

Severe storms will be possible during the pre-dawn hours on Sunday and again Sunday afternoon.

Overview

- Two rounds of strong to severe storms are forecast. The first round will be between 4am and noon. The second round of strong to severe storms will likely take shape from 2pm to 10pm
- The main hazard will be damaging winds and large hail. The tornado threat is low.
- Heavy rain will be possible, but the greatest flash flood risk will be across Central Texas.

Areas of Concern & General Timing

Sunday Afternoon – Night Round #2

Weather Forecast Office
Fort Worth, TX

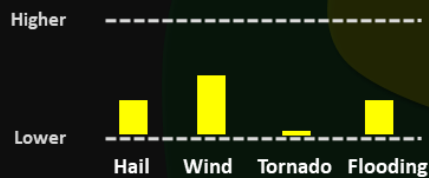

Second Round of Strong to Severe Storms Sunday Afternoon

Issued July 10, 2021 2:31 PM CT

Additional thunderstorms are expected Sunday afternoon as the front sags south toward the I-20 corridor.

The primary hazards will be strong to possibly damaging outflow winds, but large hail and heavy rain (possibly flash flooding) will be concerns as well.

Threats:

Comanche

Waco

Killeen

Hearne

Corsicana

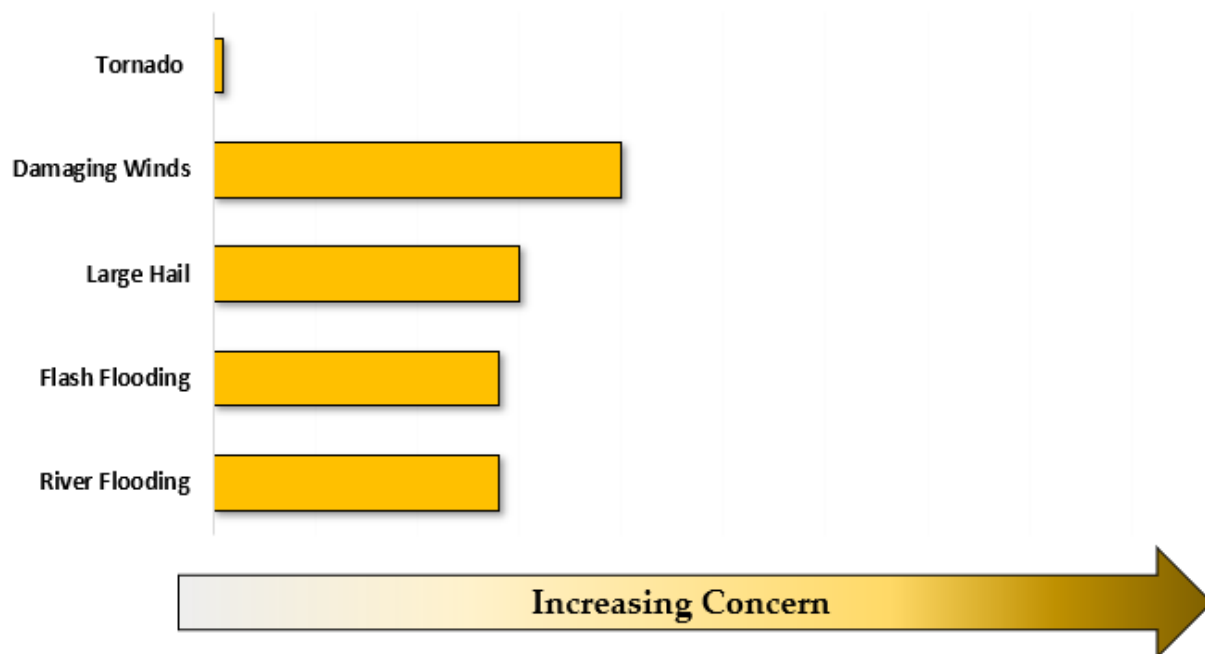

Palestine

Threats/Hazardous Weather Types

Forecaster Confidence

General Timing

What We Are Certain Of:

- There is a high likelihood of two rounds of storms Sunday.
- The 1st round will be near/north of I-20 during the morning; the 2nd round of storms is expected across Central TX during the afternoon.
- The main severe weather hazard will be damaging winds with a secondary hail and flood risk.
- The tornado threat is LOW.

What We Are Less Certain Of:

- The vigor of Sunday morning storms. Storms *should* weaken as they sag south of the Red River.
- The exact coverage of Sunday afternoon storms.

When will the next email update be sent?

- This will be the last email for this event.
